|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Timing in Episodic Memory: Virtual Characters in Action<br>Ondřej Burkert <sup>1</sup> , Cyril Brom <sup>1</sup> , Rudolf Kadlec <sup>1</sup> , Jiří Lukavský                                         | 1  |
| An Object-Based Memory for Supporting Attentive Virtual Agents<br>Christopher Peters                                                                                                                  | 10 |
| Comparing Forgetting Algorithms for Artificial<br>Episodic Memory Systems<br>Andrew Nuxoll, Dan Tecuci, Wan Ching Ho, and Ningxuan Wang                                                               | 14 |
| Short- and Long-term Adaptation of Visual Place Memories for Mobile<br>Robots<br>Feras Dayoub, Tom Duckett, and Grzegorz Cielniak                                                                     | 21 |
| I can (almost) remember what <i>you</i> are doing: from actions to tasks<br>Rudolf Kadlec and Cyril Brom                                                                                              | 27 |
| Extending Soar with Dissociated Symbolic Memories<br>Nate Derbinsky and John E. Laird                                                                                                                 | 31 |
| Exploring the Space of Computational Memory Models<br>Nate Derbinsky and Nicholas A. Gorski                                                                                                           | 38 |
| Forgetting and Generalisation in Memory Modelling for Robot<br>Companions: a Data Mining Approach<br>Patricia A. Vargas, Alex A. Freitas, MeiYi Lim, Sibylle Enz, Wan Ching Ho, and Ruth Aylett       | 42 |
| Human-like Memory Systems for Interactive Robots: Desiderata and Two<br>Case Studies utilizing Grounded Situation Models and Online Social<br>Networking<br>Nikolaos Mavridis and Michalis Petychakis | 46 |
