

Contents

Session 1

<i>A hierarchical task network planner for pathfinding in real-time strategy games.....</i>	<i>1</i>
Munir Naveed, Diane Kitchin and Andrew Crampton	
<i>A flexible bio-affective gaming interface.....</i>	<i>9</i>
Jorge Arroyo-Palacios and Daniela M. Romano	

Session 2 – AI performance

<i>Improving games' AI performance using grouped hierarchical level of detail.....</i>	<i>19</i>
David Osborne and Patrick Dickinson	
<i>Group emotion modelling and the use of middleware for virtual crowds in video-games.....</i>	<i>25</i>
Olivier Szymanczyk and Grzegorz Cielniak	
<i>Digital Footprints – recording bot movement and behaviour to improve AI opponents in FPS games.....</i>	<i>31</i>
Thomas Welsh, Alastair Hebson and David C. Moffat	

Session 3 – AI for game design

<i>Procedural content generation and level design for computer games.....</i>	<i>35</i>
Simon Cooper, Abdenour El Rhalibi, Madjid Merabti and Jon Wetherall	
<i>Evolving pixel shaders for the prototype video game Subversion.....</i>	<i>41</i>
Andrew Howlett, Simon Colton and Cameron Browne	

Session 4 – Player modelling

<i>AEINS: The role of interactive narrative in fostering character education.....</i>	<i>47</i>
Rania Hodhod, Daniel Kudenko and Paul Cairns	
<i>Using a cognitive architecture for opponent target prediction.....</i>	<i>55</i>
Simon Butler and Yiannis Demiris	
<i>Towards automatic player behaviour characterisation using multiclass-linear discriminant analysis.....</i>	<i>63</i>
Robin Baumgarten	

Poster session

<i>EDEE: a flexible environment for research.....</i>	<i>67</i>
Ningxuan Wang, Christopher Cullen and Andrew Nuxoll	
<i>A design and implementation of 3D image interactive vision system.....</i>	<i>69</i>
Sang Heon Han, Chang Ok Yun, Jung hoon Kim, Jae Ik Jo, Tae Soo Yun & Dong Hoon Lee	
<i>Distributed drama management: integrating levels of narrative responsibility.....</i>	<i>71</i>
Allan Weallans and Sandy Louchart	
<i>Towards the use of trait inheritance for flocks of navigating agents.....</i>	<i>73</i>
Piotr Piasecki and Christopher Peters	
<i>Towards a Goal Oriented Action Planning Approach for predator-prey simulation.....</i>	<i>75</i>
Justyna Pultowicz and Christopher Peters	

Demo session

<i>Digital Footprints — a tool for generating heat maps and capturing data from FPS games.....</i>	<i>77</i>
Alastair Hebson, Thomas Welsh and David C. Moffat
